Tullig.Net is pleased to announce its latest web site creation for the CLOUD News & Picture Agency. Run by extreme weather photographer Mark Humpage the agency aims to connect the public to the media and provide a channel for publishing any unusual photographs and / or stories (not just weather related). The site was built using Joomla 1.0.13 and Gallery2 as well as a host of Joomla extensions and plug-ins. The full list can be found on the credits page of the site.
