I've formalized the IT services I offer and set up a registered business under the Computer Troubleshooters franchise. This gives me the flexibility to offer many more services than I could when simply working on my own and gives you some great opportunities to obtain sales and services at a great price. For example I am now a Registered Dell Partner which allows me to resell Dell PCs, laptops and servers. So now you can not only get great Dell equipment you can buy it from someone local who can help you install, configure and maintain it. This is just one example of the services I'm now offering so for more information please visit [Computer Troubleshooters - West Cork](#)
